

## TAV (Thickening Activator): Product Information Data Sheet

### PRODUCT DESCRIPTION

SANI-TRED's TAV gives LRB great application versatility. TAV is a thick, blue colored, inert, odor-free, gel-like additive specifically designed and formulated to be blended with LRB to adjust the viscosity or fluidity of LRB from a self leveling liquid to a "thickened mixture" putty, or caulk like consistency for vertical, horizontal or inverted applications without sagging, running or slumping.
